

OASPA 2020 Final Conference Program

OASPA 2020 Online Conference on Open Access
Scholarly Publishing
#OASPA2020

21 – 24 September 2020

All times listed are UK British Summer Time (BST)

- The ‘Berlin Wall’ of prestige in academic and research ecosystem
Dasapta Erwin Irawan RINarxiv, Institut Teknologi Bandung,
Indonesia

The ‘Berlin Wall’ of prestige in academic and research ecosystem

Dasapta Erwin Irawan
[RINarxiv](#); [Faculty of Earth Sciences and
Technology](#), Institut Teknologi Bandung

Juneman Abraham
Faculty of Humanities, Bina Nusantara University

“Preprint: feel the freedom!”

“Preprinting and preprint servers give me the freedom to write a paper and opportunities to get feedback and widen my network. It will also be my exercise to share my research at the earliest possible point and explore it at the same time.”

Dasapta Erwin Irawan, Assistant Professor
Institut Teknologi Bandung, Indonesia

This presentation is part of the following works

1. Perspective article on The Conversation Indonesia - Irawan et al. 2020, [Indonesia nomor 1 untuk publikasi jurnal akses terbuka di dunia: apa artinya bagi ekosistem riset lokal](#) ([English version](#))
2. Perspective article on The Conversation Indonesia - Abraham, et al. 2020. [Jalan evolusi bibliometrik Indonesia](#)
3. Preprint - Irawan et al. 2020, [Open Access Debates in Indonesia](#)
4. [Bebaskan Pengetahuan](#) (Original version in English: Tennant. 2019, [Democratizing Knowledge](#))
5. Pourret et al. 2020, [On the Potential of Preprints in Geochemistry: The Good, the Bad, and the Ugly](#)

problems in doing science in the **Global South** (from INASP discussion June 2020)

Some examples of government's strategies to support OA

1. To release National System of Science and Technology Law (No 11/2019), mandates OA for all research funded by the government
2. To build common journal platform (using OJS 3.0) to support academic publishers [RUJUKAN](#) (Rumah Jurnal Keilmuan) hosted by Indonesia Institute of Science (LIPI)
3. To build [National Scientific Repository](#) (Repositori Ilmiah Nasional)

Some examples of Indonesia's grassroot initiatives to support OA

1. [Relawan Jurnal Indonesia](#) (Association of Journal Managers)
2. [RINarxiv](#) (Indonesia's preprint server), starting 21 May 2020, we move the old INArxiv (hosted by OSF) to Indonesia Science Institute (LIPI)
3. [Sains Terbuka Indonesia](#) and [Sains Terbuka UA](#) (Universitas Airlangga)

Databases

Garuda.ristekbrin.go.id

- 1.2 M journal articles
- 1.7K+ publishers
- 10K+ journals
- 150+ conferences
- 40 subjects

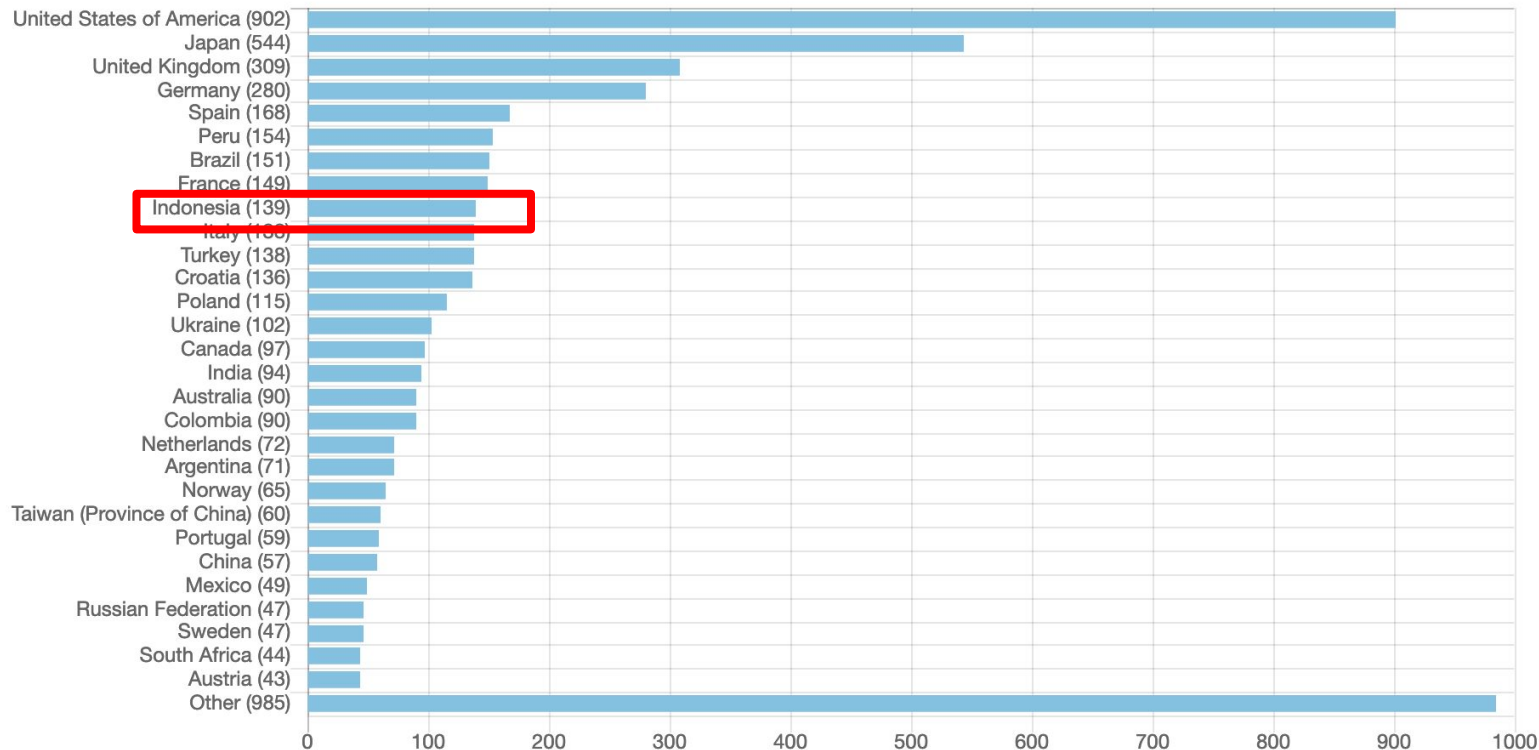

[Onesearch Perpusnas](#)

- 1.8K+ institutions
- 2.4K+ libraries
- 7.7K+ repositories

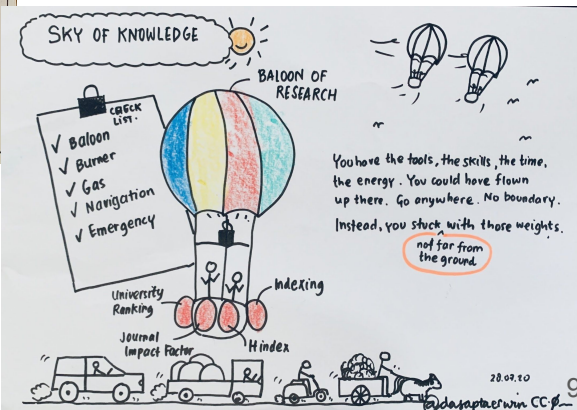

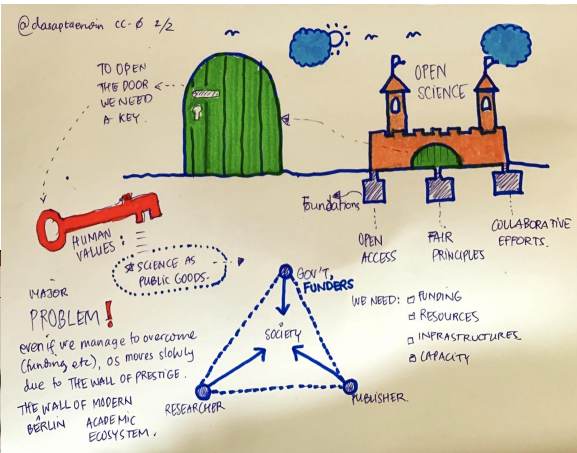

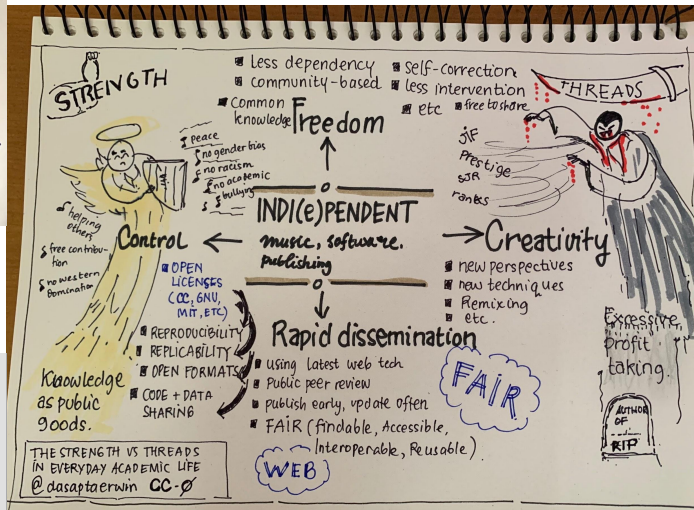

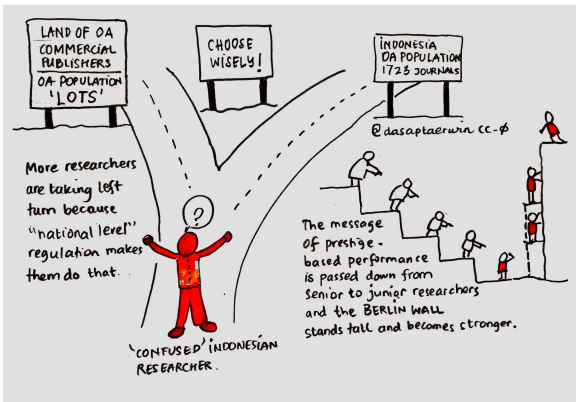

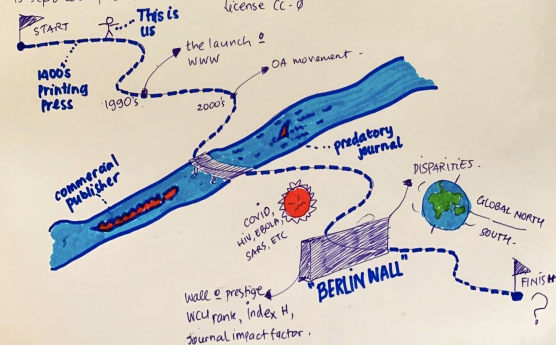

Showcasing open access repositories ([opendoar](#))

Repositories by Country

THE ROAD TO OPEN SCIENCE

Presented in Asia-Pacific Regional OS consultation
15 Sept 2020 | 12.00 - 15.00 (drawing by @dasaptaerwin | ITB | RINARIV) Page 1/6

Remarks

... in the dissemination of science, exclusivity is one thing that should be avoided the most ... ([ref](#))

We won't go BIG by relying on community and government for science infrastructure, but by being “small” we able to build that seeks to build resilience within scholarly publishing through mutual reliance and collaboration

(Citing [Sam Moore's talk](#) “... **scaling small** intends to nurture cooperation (over competition) as a sustaining force for global scholarly communication.”)

**OPEN SCIENCE:
JUST
SCIENCE
DONE RIGHT**
